If Jeffrey Epstein's autopsy notes the health of his prostate but it's known that he had previously had his removed, then he either miraculously grew a new one or that wasn't his body.

There are really no other conclusions to be had.

How about the (autopsy?) report that just came out that says his "murder" and not his suicide??? WTF???

And the wrong noose was DNA tested since his DNA wasn't on it?? The WRONG noose??? Please!!

Again, WTF???

I know, I know.....it's a movie
