Elon Musk Smashes the Digital Narratives

The Charlie Kirk Show

34m

Freedom of speech online is freer than ever, thanks to the new reality created by Elon Musk. Charlie dives deep into Musk's latest maelstrom, as he's being denounced as an anti-Semite for denouncing the ADL's anti-white and anti-American activism. But Charlie also offers some criticism of the right, and explains why it should celebrate liberal Jews coming to their senses, rather than complaining they didn't do it sooner.
